EXPERIENCE

Full Stack AI Engineer / Tech Lead

Mar 2025 - Mar 2026

SafetyConnect

Remote

- Built and deployed an enterprise RAG based chatbot combining Text-to-SQL and semantic search, **improving retrieval accuracy by 15%** and reducing average response latency.
- **Engineered an AI orchestration pipeline** with intelligent query routing, tool selection, and hybrid SQL/RAG execution, improving response accuracy while supporting complex analytical and knowledge-based queries.
- **Developed an LLM evaluation and safety framework** with guardrails, SQL validation, and observability, ensuring secure and reliable production deployments and **reducing manual QA review time by 50%**.
- Led and mentored a 6-person engineering squad; introduced CI/CD, structured code reviews, and sprint rituals that lowered escaped defects and **cut release cycle time by 20%**.

Full Stack Engineer

Feb 2023 - Mar 2025

SafetyConnect

Remote

- Architected and built a customizable dashboard that lets customers create and visualize safety data in real time, **improving reporting and personalized insights** per customer.
- Refactored Node.js microservices and tuned database for partitioning and better indexing, **cutting AWS spend by 30%** and reducing the average **API latency from 400 ms to 250 ms**.
- Implemented an automated language translation pipeline for web and mobile app to improve language support for global users.
- **Engineered a advanced template builder and its workflow engine** to transition paper-based workflows like permit to work, incident management, into efficient digital solutions.

Full Stack Engineer

Sep 2021 - Feb 2023

LST Consultancy

Nashik, IN

- Developed TaskSprint, a project-management SaaS with Kanban boards, real-time collaboration and time-tracking features.
- Integrated Stripe billing and built a product-usage analytics dashboard that informed pricing decisions and **reduced churn by 20%**.

PROJECTS

Mira AI - RAG Chatbot with Local inference [Link](#)

- Full-stack RAG chatbot using FastAPI, React, and TypeScript, integrating llama.cpp for local LLM inference and Chroma DB for vector search.

NPM Package - Sequelize with Spatialite [Link](#)

- Created a npm package to add support of spatialite library to sequelize ORM, enabling advanced geospatial queries in SQLite DB using Sequelize ORM API.

EDUCATION

SAVITRIBAI PHULE PUNE UNIVERSITY

Masters in Mathematics

Jun 2023 - May 2025

Bachelors in Computer Science

Jun 2018 - May 2021

SKILLS

AI/ LLM : Python, PyTorch, HuggingFace, LangChain, LlamaIndex, FastAPI, RAG, AI Agents, ChromaDB, Qdrant, FAISS

Backend/ Web : Typescript, React, Node.js, Next.js, Express, HTML/CSS, Tailwind CSS, Vite, PostgreSQL, AWS

Tools : Linux, llama.cpp, Ollama, MLflow, Docker, Claude Code, MCP
